

Lab Assignment 2

DBMS

Problem: Employee Management Database

Create the Following Tables:

- **DEPARTMENT**
 - dept_id (PK)
 - dept_name (UNIQUE, NOT NULL)
 - mgr_id (FK → Employee)
 - mgr_start_date
- **EMPLOYEE**
 - emp_id (PK)
 - Name (NOT NULL)
 - ssn (UNIQUE, NOT NULL)
 - address
 - salary (> 0)
 - super_id (FK → Employee)
 - dept_id (FK → Department)
- **PROJECT**
 - proj_id (PK)
 - proj_name (NOT NULL)
 - proj_location
 - dept_id (FK → Department)
- **WORKS_ON**
 - emp_id (FK → Employee)
 - proj_id (FK → Project)
 - hours (≥ 0)
 - **PK:** (emp_id, proj_id)

1. Add a column email to EMPLOYEE with UNIQUE constraint.
2. Change proj_location in PROJECT to VARCHAR(100).
3. Drop the column address from EMPLOYEE.

- Create a view HighSalaryEmployees showing employee full name, department name, and salary where salary > 80000.
- Create a view DeptProjectCount showing department name and number of projects handled.
